Due: Final Exam Date by 23:59
Description: Perform a critical analysis of an ethical topic.

The analysis should be a comprehensive, organized overview of the data and current arguments in favor of a particular view. It should show an understanding of the ethical question and support for a particular way of viewing the proposed answers to the question. Critical thinking is important in developing a good argument. The argument should include and analyze at least one opposing view and expose the weak points in the arguments for the opposing view. Your assessment should make a compelling argument for why someone would accept one viewpoint over others.

Text must not be copied from sources (except for small quotes which should appear within " "). Sources of all material must be cited. The review should be similar to a journal article in its rigor and format. The format of the bibliography should follow the IEEE style in punctuation and content.

Resources - internet, research databases (Akdeniz Library web site, IEEE Explore, Google Scholar, physical paper articles in libraries)

Deliverables:

1. Term paper

   - Analysis of argument using at least 8 articles
   - Between 3 and 5 pages
   - Argumentative Paper Format
2. Slide presentation - Set of slides to be presented to the group
3. Live presentation - 20 - 30 minute presentation on your argument. Similar to an introduction to a debate

Acceptable formats:

1. Item 1 should be a LaTeX file shared with me on overleaf.
2. Item 2 should be a shared with me through the assignment on MS Teams and shown during your presentation.
3. Item 3 will be presented live at a date to be determined.
